LIFE MADE BETTER

Introduction

The AKW Bidet offers care features similar to that of a fully integrated wash and go toilet unit. There is no other true '**Care**' retrofittable bidet currently available on the market.

The AKW bidet also offers different seats to meet the wide variety of existing toilet pans used, therefore offering a **solution** to current installations.

AKW currently distribute a fully integrated product, our Bidet compliments this product and provides you with a **lower cost solution**.

The AKW Bidet is applicable for a **Local Authority Minor Works Grant**, rather than coming under Disabled Facilities Grant (DFG) funding, when specified by an occupational therapist or other relevant social care qualified professionals.

Bidet seats can be fitted easily and discreetly to existing toilet pans to offer a gentle yet effective cleansing experience and can be customised for bespoke user experiences.

AKW®

Bidet

The solution to intimate care

Benefits of installing a bidet

Bidets are more hygienic than using toilet paper, which often doesn't clean a person properly.

Bidets can help prevent a range of different infections.

Bidets don't require the same complex levels of dexterity or physical ability that are otherwise needed.

Benefits of installing a bidet

The user doesn't touch the area with toilet paper, so they do not come into contact with bacteria and germs.

Bidets are more environmentally friendly than using toilet paper.

Bidets can be operated without any additional help for the majority of people with disabilities, promoting both privacy and dignity.

Features & benefits

Ideal for social care and private installations, the AKW bidet has been developed to offer a cost-effective, quick to install, easy to use and maintain bidet for those wanting a non-permanent solution.

Adjustable spray, temperature and dryer settings allow the user to tailor the bidet to meet their specific comfort and cleaning requirements.

Spray control

- + 5 rear wash positions
- + Feminine wash
- + 5 spray intensity settings (approx. 0.6L-1L per minute)
- + 1-2 minute wash cycles
- + 4 spray modes: Steady, Pulsating, Oscillating, Pulsating + Oscillating

Features & benefits

Temperature controlled water

- + High power, 1750w instantaneous water heater
- + 2 minute constant wash cycle
- + 1 minute gradual cooling wash cycle
- + 6 stage temperature control (approx. 31-39°C)
- + Side entry water supply

Dryer settings

- + 350W dryer
- + 3 minute standard drying cycle
- + 6 temperature settings (40-52°C approx.)
- + 5 adjustable speed settings

Quick and easy to install by any qualified, competent tradesperson, in compliance with UK electrical and water regulations.

Features & benefits

Self-cleaning function ensures the nozzle and surrounding area are hygienic.

- + Pre and post wash nozzle cleaning
- + Automatic water purge if not used for 72 hours

Night light helps users with sight loss or dementia locate the toilet in the dark.

Quiet and efficient operation promotes user dignity whilst providing a reliable experience.

- + Low noise heater, water pump, dryer motor
- + Pressure and flow optimised for efficient and continuous cleaning

Remote control provides full function control via a handheld ergonomic remote, which is easy to use and helps maximise user dignity.

Easy to clean with very little maintenance required throughout the bidet's lifetime.

Features & benefits

Integral seat sensor prevents accidental usage by ensuring activation only occurs when the seat is in use.

Lid and seat lift assist with front moulded grip and contrasting side tabs.

Quick release seat and lid makes cleaning, maintenance, or even moving property easier.

Soft close seat and lid is slower, quieter and therefore safer for users.

Seat lugs for stability when side transferring.

Strong load limit of 150kg/23.5st ensures bidet is suitable for a wide variety of users.

UK sized aperture allows for compatibility with AKW and most common UK toilet pans.

Features & benefits

Low pressure mode

As we know the performance of electric showers can differ when installed in areas with low water pressure, the AKW bidet has been designed to operate efficiently in spite of this common challenge.

When in standard mode, the AKW bidet requires 0.5 (dynamic)–10 (static) bar of pressure to achieve a flow rate of 0.6L-1L per minute. This water is instantaneously heated with no restart time required.

If the water supply experiences low pressure, low pressure mode can be selected to allow the bidet to continue working efficiently by limiting the flow rate available to the user.

Low pressure mode requires just 0.2 (static)-10 (static) bar to achieve a flow rate of 0.45L-0.65L per minute, with a maximum 25 second restart period.

Remote control

- + Change modes
- + Decrease temperature
- + Decrease spray intensity
- + Adjust nozzle position

- + Change modes
- + Increase temperature
- + Increase spray intensity
- + Adjust nozzle position

Seat Options

AKW
Life Made Better

The **Standard Seat** has been designed to fit flush on AKW **New** Doc M and Navlin Sanitaryware ranges being introduced

The **Ergonomic Seat** has been designed to fit with AKW Livenza Sanitaryware and is a universal option if people wish to fit the AKW Bidet on most other brands of Sanitaryware.

Doc M

AKW Standard Bidet on Doc M raised height back-to-wall toilet pan

Navlin

AKW Standard on Navlin back to-wall toilet pan.

Livenza

AKW Ergonomic Bidet on Livenza standard close coupled toilet pan.

Installation

The AKW bidet is very simple to install and should be fitted by a qualified, competent tradesperson in accordance with UK electrical and water regulations.

Installation tips:

- + Supplied with a 1.5m 3 core flex which can be wired into a fused spur – we recommend it is switched.
- + As the unit is only 1.8kw it can be connected to a standard domestic ring main and doesn't need a dedicated feed.
- + Use the cistern water feed that is already installed. We even provide a 'T' piece to make the connections.
- + Connection to the water should be made with a flexible hose and an isolation valve should also be installed.
- + Seat is supplied with an installation template to ensure it is positioned correctly and only requires a screwdriver to secure in place.
- + Suitable for use in areas that experience low water pressure.

Approvals

BS EN 60335

BS EN 60335-1 provides best practice recommendations for safety testing household and similar electrical appliances. This amendment aligns the standard with the legislative framework of the new Low Voltage Directive.

WRAS Approval demonstrates that a product won't cause waste, misuse, undue consumption or contamination of the water supply

+ 2 year warranty

CE marking is an important procedure that guarantees product's conformity to EU regulations.

Summary

- + **Only retrofittable bidet** product on the market that offers **true care features**, similar to those of a fully integrated wash and go toilet.
- + Can be **fitted easily and discreetly** to most existing UK toilet pans, having been designed for a wide variety of UK customers.
- + Offers a **gentle yet effective cleansing experience** that can be **customised** for the user's individual toileting requirements.
- + Suitable for use in areas that experience **low water pressure**.
- + **Promotes independence and dignity**, allowing the user greater privacy when using the toilet.
- + **Competitively priced** against other retrofit bidet products and **cheaper than fully integrated units** – eligible for funding via **Minor Works Grants** in most areas.
